

AMENDMENT(S) TO THE CLAIMS

1. (Currently Amended) An orthopaedic reamer assembly, comprising:
a reamer; and
a driver including:
a shaft including a distal end and a longitudinal axis; and
5 a driver head connected to said distal end, said driver head ~~pivotal~~ foldable
approximately 90° about an axis generally perpendicular to said longitudinal axis, said driver
head detachably connected to said reamer.
2. (Original) The orthopaedic reamer assembly of claim 1, wherein said reamer includes
a generally hemispherical shell with cutouts for clearance with said shaft.
3. (Original) The orthopaedic reamer assembly of claim 1, wherein said driver includes
at least one rod which pivots said driver head.
4. (Original) The orthopaedic reamer assembly of claim 3, wherein said driver includes a
knob, said at least one rod is actuated by said knob.
5. (Original) The orthopaedic reamer assembly of claim 3, wherein said driver includes a
tube at least partially covering both said shaft and said at least one rod.
6. (Original) The orthopaedic reamer assembly of claim 5, wherein said tube includes at
least one indicia that indicates at least one proper actuation of said orthopaedic reamer assembly.

7. (Original) The orthopaedic reamer assembly of claim 3, wherein said at least one rod includes at least one cam raceway.

8. (Original) The orthopaedic reamer assembly of claim 1, wherein said driver includes at least one longitudinal groove.

9. (Currently Amended) An orthopaedic driver, comprising:
a shaft including a distal end and a longitudinal axis; and
a driver head connected to said distal end, said driver head ~~pivotal~~ foldable
approximately 90° about an axis generally perpendicular to said longitudinal axis, said driver
5 head configured for detachable connection with an orthopaedic reamer.

10. (Previously Presented) The orthopaedic driver of claim 9, wherein said driver includes at least one rod which pivot said driver head.

11. (Previously Presented) The orthopaedic driver of claim 10, wherein said driver includes a knob, said at least one rod is actuated by said knob.

12. (Previously Presented) The orthopaedic driver of claim 10, wherein said driver includes a tube at least partially covering both said shaft and said at least one rod.

13. (Previously Presented) The orthopaedic driver of claim 12, wherein said tube includes at least one indicia that indicates at least one proper actuation of said orthopaedic driver.

14. (Previously Presented) The orthopaedic driver of claim 10, wherein said at least one rod includes at least one cam raceway.

15. (Previously Presented) The orthopaedic driver of claim 9, wherein said driver includes at least one longitudinal groove.

16-25. (Canceled)
